Forecast for Friday 25 Jun 2021

Weather: Cloudy with outbreaks of rain clearing east through the morning. Cloud will break, giving some sunny spells, but also a risk of a few heavy showers through the afternoon. These perhaps with the odd rumble of thunder, but this is low confidence. Showers then fading during the evening, but staying cloudy.

Chance of cloud free mountain/hill tops above 600m: 30% increasing to 80% during the morning.

Visibility: Poor visibility likely through the morning, especially on hills above 400m which are likely to be shrouded in cloud. This cloud will lift and break up through the day, with only occasional patches lingering on hills above 800m, or returning during any showers. Best of the viewing conditions will be through the afternoon, away from showers, where some moderate to good visibility is possible.

02:00 on Fri 25 Jun 2021	2.4mm	2.4mm	2.4mm

Forecast for Saturday 26 Jun 2021

Weather: Generally dry but cloudy initially, however cloud will break up a little during the morning with a mixture of sunny spells and showers from late morning. These becoming locally heavy during the afternoon with perhaps the odd rumble of thunder.

Maximum wind: Northwesterly 20 mph gusting 25-30 mph.

Chance of cloud free mountain/hill tops above 600m: 30% increasing to 90% during the afternoon.

Visibility: Generally good at low levels, but poor above 500m at first with hills becoming shrouded with cloud through the early hours. This cloud level should gradually break and lift through the day, but hills above 800m occasionally obscured. Some poor visibility also likely during any heavy showers that occur.

Temperature: **Valleys:** Plus 11 Celsius rising to Plus 21 Celsius.
At 600m: Plus 8 Celsius rising to Plus 14 Celsius.
Freezing level: Above summits.
